EDUCATION

- BTech in AI & Data Science**
K.K. Wagh Institute of Engineering Education and Research
CGPA: 8.6
- Diploma in Computer Engineering**
2024
89.7%
- SSC BOARD(Class 10th)**
2021
89.80%

TECH STACK

- Languages: C, C++, Java, JavaScript, Python
- Frontend: HTML, CSS, React.js, State
- Backend: Node.js, Express.js
- Databases: MongoDB, MySQL
- Core Concepts: OOP, Android Development
- AI & Data Science: Python for AI/ML, NumPy, Pandas, Scikit-learn, Matplotlib
- Tools & Platforms: GitHub, VS Code, Postman

LANGUAGES

- English (Professional)
- Hindi (Professional)
- Marathi (Professional)

AISHWARYA M. SAHANE

Results-driven AI & Data Science student with strong foundations in **Data Structures, Operating Systems, and Machine Learning**, experienced in building scalable backend systems and ML-integrated applications. Skilled in performance optimization, **system-level design**, and developing efficient, high-impact solutions for real-world problems in high-performance computing environments. Skilled in developing go-to-market strategies and increasing product visibility through digital platforms. Capable of **leading teams** with a focus on **productivity, collaboration**, and goal achievement.

INTERNSHIP

Full-Stack Web Development (Feb 2026)
Calibers Infotech
Key Skills: Frontend

Web Applications (January 2025)
CodeAlpha
Key Skills: React.js, MongoDB, Node.js, Express

PROJECTS

AgriRent : AI-Powered Farm Equipment Marketplace (Feb 2026)
Implemented an AgriTech platform (Django, Python, scikit-learn) with a Random Forest model (7 inputs, 22 classes), role-based auth, and normalized schema for scalable equipment rental workflows

Email Automation (Oct 2025)
This Python script automates the process of sending an email at regular intervals (every 10 seconds) using the schedule library. It leverages the smtplib and ssi libraries to handle the email sending securely through a Gmail SMTP server.

Smart Script (Aug 2025)
AI-Based Frontend Generation System Developed an AI-powered MERN stack web application that generates complete frontend websites from user prompts in multiple languages using NLP, with secure authentication and authorization; containerized using Docker for scalable deployment.

CERTIFICATIONS

- Web Tech Foundations**
Skills: (HTML, CSS, JS) | Calibers Infotech
- AWS Cloud**
AWS Cloud Quest: Cloud Practitioner

ACHIEVEMENTS

- Member, Unstoppable Igniters Club
- Represented Research Paper at Carnival 2025
- Class Topper of Fifth Semester

CO-CURRICULAR

- Participated in coding contests and technical competitions
- Worked on academics and collaborative development projects

EXTRA-CURRICULAR

- Grew a social media presence to secure 150+ brand collaborations, demonstrating self-driven project ownership, stakeholder communication, and delivery under real business constraints.
- Selected as Campus Ambassador for GIVA and AJIO based on social media content quality and audience engagement.
- Developed and sold handmade skincare products, gaining experience in business management, marketing strategies, and client servicing.
- Represented Nashik at State level in 100m sprint in Athletics
